## HARDWARE

### PIN and Proximity Reader, CR-R885-BL

Experience the beauty and power of PosiPIN. A keypad integrated into the PosiProx reader provides access control systems with the convenience of both in one device. PosiPIN can be programmed to require that a user presents a card to the reader and enters a PIN on the keypad before access is granted, making it ideal for exceptional control for high-security doors and areas. Its programmable LED and Face Light combinations offer you remarkable flexibility for situations demanding superior visual cues. Since it possesses several keypad communication formats and two reader communication formats, PosiPIN is compatible with most systems.
